River Hills Police Dept. - WI uses Axon Automatic License Plate Reader (ALPR) technology to capture objective evidence without compromising individual privacy. We utilize real-time alerting in patrol vehicles to arrest wanted criminals, recover stolen vehicles and locate missing persons that are on various hotlists. We also retain vehicle and plate images for a period of time to perform searches when investigating reported crimes. All of this data is secure, not sold to 3rd parties, and only used for law enforcement purposes by authorized personnel. This page shows our ALPR policies and usage statistics so that you may understand how this technology is used to help keep your community safer.

### What We Detect

Default

License plate image, vehicle image, plate text, date, time and location.

### What We Don't Detect

Default

Facial images, people, gender, or race.

### Acceptable Use

Default

Data is used for law enforcement purposes only. Data is agency-owned and is never sold to 3rd parties.

### Prohibited Uses

Default

Harassment, intimidation, usage based solely on a protected class (race, sex, religion, etc....), personal use.

### Data Access

Default

All data searches require a valid search reason or case number which is captured in audit logs and stored indefinitely.

### Hotlist Verification

Default

Hotlist alerts are required to be human-verified before taking action.
